Summary

AI/ML engineer with 2+ years of hands-on experience building and optimizing production-grade systems. Achieved **95% latency reduction (7h → 18min, 13,000ms → 300ms)** and improved model accuracy **64% → 85% (+21 pts)** in LLM pipelines. National hackathon winner with proven expertise in real-time systems, NLP, and scalable AI deployment.

Professional Experience

Software Engineering Intern (Frontend – Startup MVP), *Wandrai Dashboard, Delhi* 10/2025 – 11/2025
Delhi

- Built production-grade UI components and collaborated with backend teams for system integration
- Improved UX flows and interface consistency, accelerating product iteration cycles
- Gained hands-on experience with real-world deployment workflows and cross-team development

Education

Bachelor of Technology in Computer Science, 09/2023 – 09/2027
KCC Institute of Technology & Management (KCCITM) Noida, India

Technical Skills

Programming Language
Python, C, C++, JavaScript, SQL, HTML/CSS

Tools & Platforms
Git, Flask, TensorRT, OpenCV, Docker, AWS, Jupyter Notebook

AI/ML Framework Libraries
TensorFlow, PyTorch, Scikit-learn, YOLOv8, Hugging Face, Pandas, NumPy

Specialized Domains
NLP, LLM Optimization, Real-time Systems, Recommendation System (Content-Based)

Projects

IronGuard : AI Security Gateway for LLM Protection | Github, *Tech: Python, FastAPI, NLP, Vector DB, LLM Security*

- Engineered a multi-layer LLM security gateway to detect prompt injection, jailbreaks, and PII leaks
- Improved detection **accuracy ~64% → 84.8%** and **TPR 60% → 89.9%** on 2.7K+ attack prompts
- Reduced latency **13,000ms → 372ms (~97% faster)** via pipeline optimization
- Designed hybrid detection pipeline with real-time risk scoring

VisionX : Real-Time Critical Object Detection (Hackathon Winner) | Live, *Tech: YOLOv8, OpenCV, TensorRT, Flask*

- Developed real-time detection system with **93% accuracy** for safety-critical environments
- Optimized inference using TensorRT for low-latency edge deployment
- Won **National Level Hackathon** for innovation in AI-based safety systems

ResumeSnap : AI Powered Resume Analyzer & Job-Matching System | Live,
Tech: Python, NLP, OCR, Scikit-learn, Streamlit

- Developed AI-powered resume analyzer with OCR + NLP for structured data extraction and job matching
- Designed scoring system to rank resumes against job descriptions using keyword + semantic matching
- Built content-based recommender system using cosine similarity on 5K+ dataset

Achievements

Winner: National-Level AI Hackathon (VisionX)

- Developed a critical object detection system for space station environments, recognized for innovation in real-time safety applications.
